SUMMARY

Resourceful and mechanically minded engineer with a strong foundation in practical problem-solving and engineering analysis. Skilled in mechanical systems, tools, and simulation using ANSYS, with proven ability to take initiative and lead by example. Dependable and focused under pressure, driven by curiosity for how things work, and committed to delivering high-quality, reliable results.

WORK EXPERIENCE

Freelance - Mechanical Repair & Maintenance Technician Jan 2015 - Present

- & Diagnosed, repaired, and restored mechanical, automotive, and electronic items for resale, sourcing cost-effective parts and averaging approximately RM250 profit per project
- & Performed automotive maintenance services for 20+ private clients, including brake pad replacement, brake bleeding, and alternator-related work.
- & Assisted in renovation and property maintenance projects involving installation and repair works with budgets up to RM1,000, developing strong hands-on troubleshooting and problem-solving skills.

Solarvest - Project Engineer Intern Oct 2025 – Dec 2025

- & Conducted site surveys for solar panel installations using drone operations and electrical measurement devices to assess building power output via Main Switch Board (MSB) systems.
 - & Coordinated communication between multiple companies while documenting and summarizing key discussion points from meetings to support project execution.
 - & Managed technical documentation and data analysis in Excel, including roof structure assessments, building electrical output analysis, and cost comparisons, strengthening data collection and organizational skills.
-

EDUCATION

Sijil Pelajaran Malaysia (SPM)

Jan 2014 - Nov 2018

Sabah Tshung Tsin Secondary School (STTSS)

- & Graduated while paying my own school fees by doing part time jobs with self-transportation between work, school and home.
- & I've graduated with 4A's even with my setbacks through determination and hard work proving my ability to work under pressure.

Bachelor of Degree in Mechanical Engineering

Jan 2022 - Present

City University Malaysia (Cyberjaya Campus)

- & Completed all degree requirements.
 - & My engineering prowess has been recognized by my peers and lecturers. I have also taught some other students regarding tough engineering related subjects.
-

ADDITIONAL INFORMATION

- & **Technical Skills:** Project Management, Proficiency in ANSYS, Structural & CFD Analysis
- & **Languages:** English (Fluent), Malay (Fluent), Chinese (Conversable)
- & **Awards/Activities:**
 - Representative for City University under the MAHSA University Engineering, Science and Technology 2025 competition (Won Gold Placement).
 - Engineering Innovation Exhibition 2026 (Won Silver Placement).
